Main goal of master's degree program is: training new types of specialists, who are able to manage projects at all stages of implementation, make effective decisions on their resource and organizational support, integrate innovation and investment processes, use industry-specific digital platforms and implement comprehensive planning of the company's project portfolio in order to achieve sustainable development.

The courses of the program are divided into two blocks: compulsory - providing basic training, and elective courses, allowing to obtain a "soft" specialization in the area that the student chooses for his own research. Courses are taught in English and Russian. The competitive advantage of the program is investment and innovation components of project management. We are training specialists, who are orienting both in design and management procedures, who can be working with projects of various sizes, including large projects.

Duration of training: 2 years
Form of education: full-time
Language of instruction: English
Price: 79 800 RUB. per semester. Discounts are available.
Conditions of admission: bachelor's or specialist's degree on higher professional
