MAI

Winter Aviation Engineers

1. Additive manufactory school.

3D manufactory science (Winter version)

The main objective of this school is to study the foundations of additive technologies (in Basic course) and then level up all the knowledge in CAD system design. You will get overview technical knowledge about additive manufacturing science for nowadays.

Best point – excursion and online videos from winter Russia, when you will be able to feel the cold and Christmas soul through your screens and laptops.

The first program - only in 2022 - for your choice

Additive manufactory school

3D manufactory science (Winter version)
